

# 15MWh Mobile Energy Storage Container Procurement Contract for Resort

## Overview

---

How many MW of energy storage will be built in SCE?

Resolution E-4937 approved SCE's energy storage solicitation to comply with SB 801. To date the CPUC has approved procurement of more than 1,533.52 MW of new storage capacity to be built in the State. Of this total 506 MW are operational.

What are energy storage contracts?

These contracts allocate the risks of project development, construction, and performance between the parties and include the price that will be paid by the utility for the resource or the energy storage services that are to be provided.

What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

Are energy storage projects a meter utility scale project?

The majority of new energy storage installations over the last decade have been in front of the meter utility scale energy storage projects that will be developed and constructed pursuant to procurement contracts entered into between project developers (or a special-purpose project company owned by such developers) and the utilities.
