### http

Since it's not mentioned anywhere in the grammar, the only way to encode a space is with percent-encoding (%20). In fact, the RFC even states that spaces are delimiters and should ...

### [How do I replace spaces with %20 in PowerShell?](#)

The output transformation you need (spaces to %20, forward slashes to %2F) is called URL encoding. It replaces (escapes) characters that have a special meaning when part of a URL ...

## [The origin on why '%20' is used as a space in URLs](#)

I am interested in knowing why '%20' is used as a space in URLs, particularly why %20 was used and why we even need it in the first place.

## [URL encoding the space character: + or %20?](#)

As the aforementioned RFC does not include any reference of encoding spaces as +, I guess using %20 is the way to go today. For example, "%20" is the percent-encoding for ...

## In a URL, should spaces be encoded using %20 or +? [duplicate]

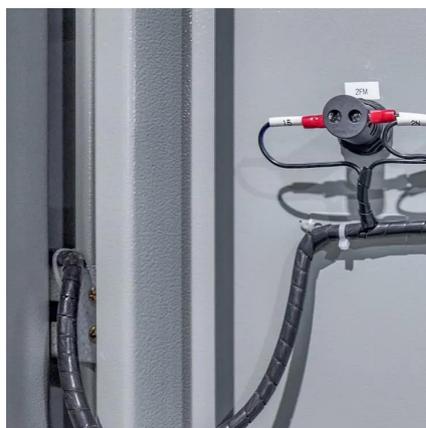

@MetaByter I think it is more technically correct to phrase the question as "In a URL, should I encode the spaces using %20 or + in the query part of a URL?" because while the example ...
