

20kW Photovoltaic Container Used in Wanxiang Cement Plant

Overview

This work describes the implementation of concentrated solar energy for the calcination process in cement production. Approach used for providing solar energy includes the utilisation of a solar tower sy.

Who is Wanxiang solar?

Wanxiang has been in the Renewable Energy Business since 2000. Universal Solar (Wanxiang Energy) is a manufacturer of solar panels for industrial and residential use with manufacturing facilities in Rockford, Illinois outside Chicago.

How to run solar reactor for calcination of raw material in cement production?

Solar and thermal energy needed to run the solar reactor for the calcination of raw material in cement production using a heat balance equation is as follows: Solar incident power on the solar reactor (Gonzalez and Flamant, 2013): (7) $Q_{SR} = Q_r \times n + Q_{hrm} - \% Q_I$ The mirror surface needed: (8) $S_{mirror} = \frac{Q_{SR}}{\eta_{SF} DNI}$

How calcined meal is used in a solar cement plant?

Solar cement plant operation during the day with a solar multiple (SM) > 1. Once more, the storage or conventional calciner makes up the difference between the generated calcined material and the design point. After the solar reactor achieves its optimum value, the calcined meal is immediately provided for the subsequent process.

Which cement plant is used for solar thermal application?

Location and DNI availability of the investigated plant A conventional cement plant (Kotputli Cement Works (KCW), an UltraTech Cement Limited manufacturing unit) at Kotputli, Jaipur, Rajasthan, was investigated for solar thermal application.

20kW Photovoltaic Container Used in Wanxiang Cement Plant
