A 340 watt solar panel represents a mid-range power output option that has gained significant popularity in both residential and commercial solar installations. These panels offer an optimal balance between power generation, physical size, and cost-effectiveness, making them an attractive choice.

The high quality solar panels have a 25 year power output guarantee and a +5W output tolerance. The enclosures and solar mount can be mounted to a wall or pole (2-4") with the included mounting system. Features include advanced MPPT battery charge controllers with LVD load control and RS485.

Introduction: ST-340Q-24M utilizes high efficient monocrystalline solar cells and the latest solar module production technology. It is widely used in various 24V off-grid applications such as traffic and safety, telecommunications, lighting, recreational vehicles, marine., etc. Its sturdy aluminum.

The 340W solar panels are compatible with various solar energy systems, including grid-tied and off-grid setups. Homeowners can also pair these panels with energy storage solutions, such as home batteries, to store excess energy for use during peak hours or in case of power outages. EnergyPal is a.
