## Overview

---

How many agrivoltaic projects are there in the United States?

As of March 2023, the National Renewable Energy Laboratory had identified 314 agrivoltaic projects in the United States representing over 2.8GW of solar capacity, of which most were focused on grazing and pollinator habitat, with relatively integrating crop production.

Can solar PV and agriculture colocate?

A journal article published in Nature Sustainability finds the co-location of solar PV and agriculture could provide agricultural enterprises with diversified revenue sources and ecological benefits, while reducing land use competition and siting restrictions.

How can agrivoltaics improve agricultural production?

Exploring alternate solar system designs and agricultural practices that optimize both energy and agricultural production at co-located sites may offer opportunities to increase overall value and lower soft costs, or non-hardware costs, of solar energy. Learn more about how soft costs work. [Why is Agrivoltaics Important?](#)
