

60kW Off-grid Solar Container for Field Operations

Overview

What is an off grid solar power system?

Off grid solar power system doesn't connect to the power grid. In general, it includes solar panels, charger controller, batteries and inverter. This system will store the solar power into the batteries, batteries energy will be converted the electricity power to supply the appliances working through the inverter.

What is a 60 kW solar system?

A 60 kW solar system is a complete PV solar power system that includes solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans, and instructions. These grid-connected solar kits from SunWatts can work for a home or business, with just about everything you need to get the system up and running quickly.

How much space does a 60kW Solar System need?

A 60kW Solar System requires up to 4,300 square feet of space. 60kW or 60 kilowatts is 60,000 watts of DC direct current power. This could provide approximately 7,000 kilowatt hours (kWh) of alternating current (AC) power per month under ideal conditions, assuming at least 5 sun hours per day with the solar array facing South.
