

AC DC integrated uninterruptible power supply

Overview

This power supply is supplied by mains voltage and contains an integrated DC uninterruptible power supply feed by an external battery. It is designed to supply the applied load continuously and without interruption, even when the mains power fails.

This power supply is supplied by mains voltage and contains an integrated DC uninterruptible power supply feed by an external battery. It is designed to supply the applied load continuously and without interruption, even when the mains power fails.

A UPS supplies power even in the event of mains failure and protects your system against supply interruptions. We offer UPS solutions for DC and AC applications where the functionality and design are optimally tailored to the requirements of various different industries. Supply your system reliably.

Integrated Power Designs (IPD) is an ISO 9001:2015 registered company. IPD is a US Power Supply manufacturer of AC-DC & DC-DC supplies ranging from 25-400 watts. Since our founding in April of 1985, we have been committed to on time delivery of quality product while minimizing our environmental.

Efficient, compact and reliable DC-UPS from PULS ensure highest system availability. Our uninterruptible power supplies are available with capacitor storage or VRLA batteries. The DC-UPS with integrated electrochemical double layer capacitors are fully maintenance free and guarantee an.

Compact AC and DC-input DIN-rail units providing adjustable 24VDC outputs and status signals. Line-interactive UPSs with rechargeable batteries that maintain uninterrupted power to critical loads via multiple output sockets during mains failures; they also protect from mains undervoltage and.

Bridge the power supply gap with Infineon's total solutions for online and offline uninterruptible power supplies (UPS) systems. Factors such as the rising trend towards the internet of things (IoT) and smart buildings, a growing number of datacenters across the globe, virtualization, and cloud.

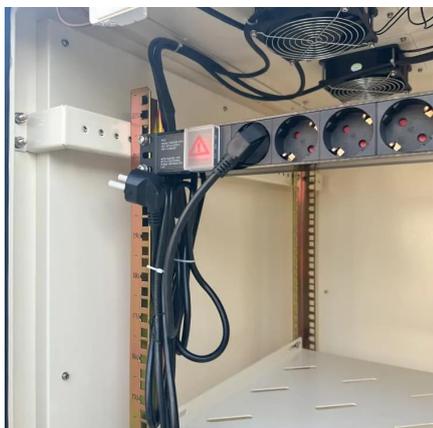

Uninterruptible power supplies (UPS) are essential to ensure you have continuous

power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers.
