

Algiers grid-connected solar panels

Overview

How many solar panels are there in Algeria?

“In total, Algeria has an assembly capacity of 500 MW for solar modules, which is expected to increase to 600 MW to 700 MW by the end of 2025,” said Clean Power’s Bakli. Alongside Zergoun, the manufacturer Lagua Solaire has 200 MW of annual capacity for solar panel production in Algeria.

How much does solar power cost in Algeria?

Algeria’s Hamdi Eurl won two 80 MW plants and domestic PV panel maker Zergoun, alongside Ozgun, secured 80 MW in Guerara. The 19 projects represent an investment of €1.8 billion (\$1.96 billion) and the solar power prices proposed by the bidders ranged from €0.54/W to €0.81/W, with an average price of €0.625/W.

How do PV systems work in Algeria?

When the PV system and storage devices are not sufficient to supply the load, the grid is used to supply the deficit power. In Algeria, the purchase price of electricity (EPR) is 0.045 \$/kWh. However, there is no incentive schemes for commercial and residential scale PV systems.

Why is electricity consumption increasing in Algeria?

In Algeria, in specific in last decade, the electricity demand of the building sector has been increased rapidly, by 8.3% annually, which makes this sector account for 43% of total electricity consumption . The main reasons are the rapid growth of consumers, whose total number has exceeded 9.6 million by 2018 .
