

# Antimony Chromium solar Glass Company

## Overview

---

How much antimony is in solar glass?

World Health Organization (WHO): A limit of 5 ppb. California Environmental Protection Agency (CalEPA): A public health goal of 1 ppb for Antimony. Proportion of Antimony in solar glass is typically 0.2% to 0.3% (2 to 3 million ppb). Each PV module has a front glass weighing about 16 kg and thus an Antimony content of 32 to 48 grams.

Can Borosil remove antimony from solar glass?

Borosil has been able to successfully remove the Antimony from Solar glass. Institut für Solartechnik SPF, SWITZERLAND, widely considered a GOLD STANDARD for testing and certification of solar glass publishes on its website, test results of solar glass from some of the top solar glass manufacturers in the world.

Is Borosil antimony free glass a good choice?

Test results published by SPF establish that Antimony free glass by Borosil has nil photo-degradation and the highest efficiency amongst the solar glasses.

What float glass products does AGC offer?

AGC offers extra clear float glass products for a broad range of solar applications. Your single source: High-efficient float glass production, glass coating, glass processing as well as high-capacity production of flat solar mirrors. Everything is highly automated, precise and efficient. Ability to scale up to meet your project-driven demand.

## Antimony Chromium solar Glass Company

### NoSbEra Antimony Free Solar Glass

Borosil has developed NoSbEra: World's first Antimony-free solar glass. The world is staring at a burning issue of the most hazardous substance "Antimony" present in solar glass.
