

Assembled solar panels

Overview

A solar panel system kit is a pre-packaged set of components that includes everything you need to install a solar power system in your home. These kits typically include solar panels, inverters, mounting hardware, and wiring.

A solar panel system kit is a pre-packaged set of components that includes everything you need to install a solar power system in your home. These kits typically include solar panels, inverters, mounting hardware, and wiring.

Industrial grade, 72 cell solar panels offer a large amount of power and a 25 year performance warranty. SolarSet offers solutions from 1700 watts to over 60 KW, spanning a wide range of residential and commercial applications. With the modular design, solar systems can be expanded and changed at a.

While Chinese companies are undisputed leaders on the world's solar market, there are enough brands in America that make solid modern competitive PV modules. Usually, they come at a slightly higher price than the Asian product, but in return you get panels of a higher quality and with better.

Our solar panel kits for home are easy for you or a contractor to install. Each solar panel kit comes with solar panels, grid-tie inverters and mounting hardware and is customized to your energy needs and home's unique specifications. Take our quick questionnaire to create a custom solar panel kit.
