

Austria small solar container system equipment

Overview

Solarcont has developed a portable, containerized PV system featuring 240 solar modules on a folding system for easy removal and storage. Solarcont, an Austrian startup, has unveiled Solarcontainer, a portable PV generator that can function as a mobile solar plant independent of the electrical grid.

Solarcont has developed a portable, containerized PV system featuring 240 solar modules on a folding system for easy removal and storage. Solarcont has developed a portable, containerized PV system featuring 240 solar modules on a folding system for easy removal and storage. Solarcont, an Austrian startup, has unveiled Solarcontainer, a portable PV generator that can function as a mobile solar plant independent of the electrical grid.

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

Solarfold allows you to generate electricity where it's needed, and where it pays to do so. The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight design makes it easy to transport and set up.

With Solarfold, you produce energy where it is needed and where it pays off. The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, enables rapid and easy installation.

Austria-based Solarcont has just launched Solarcontainer, a shipping container-sized device that lets you set up a mobile solar power plant just about anywhere. This grid-independent solution is ideal for use in remote areas, as it can ensure a stable energy supply or even replace a public grid.

The Austrian energy company SolarCont has developed a mobile solar container

that stores foldable photovoltaic panels for portable green energy anywhere. The foldable photovoltaic panels are tucked inside a container frame with corresponding dimensions, and once they are moved and set in place.
