

# Bangui Distributed Energy Storage BESS

## Overview

---

Are battery energy storage systems economically feasible?

Many studies have noted that in order to ensure not only the technical, but also the economic feasibility of using battery energy storage systems, it is necessary to implement various functions in one storage device.

What are some examples of Bess-assisted charging hubs?

One compelling example is the Senawang Layby Northbound and Southbound in Negeri Sembilan, where Gentari and EV Connection have deployed two BESS-assisted charging hubs with 300kWh of storage. Each site features two double output Kempower Station Chargers with CCS2 outlets, allowing a charging power of up to 150kW.

How many Bess are installed in the electrical network?

There are no BESS in the electrical network ( $K_{res} = 0\%$ ). Option No. 2. BESS are installed in all nodes of the electrical network ( $K_{res} = 100\%$ ). Each BESS provides backup power supply only for the loads of consumers connected to the BESS installation node.
