

# Belgian mobile energy storage site wind power tender

## Overview

---

Why has Belgium halted a 700 MW wind farm tender?

Belgium's federal government has halted the 700-MW tender for the first site of the Princess Elisabeth Zone (PEZ) in the North Sea, postponing the competitive procedures due to increased costs. Offshore wind farm. Author: Beverley Goodwin. License: Creative Commons, Attribution 2.0 Generic.

Will Belgium increase its offshore wind capacity by 2032?

Belgium aims to increase its 2.3 GW of operational offshore wind capacity by adding capacity across the three plots in the Princess Elisabeth wind zone by 2032. Meanwhile, construction is ongoing at the Princess Elisabeth Island, the world's first artificial energy island that will collect and transmit electricity generated by the offshore zone.

Why did the Belgian Council of Ministers put off a wind farm auction?

Offshore wind farm. Author: Beverley Goodwin. License: Creative Commons, Attribution 2.0 Generic The Belgian Council of Ministers has decided to put off the auction largely due to regulatory issues related to the proposed timeline and legal framework for the tender.

When will the artificial energy island be built in Belgium?

Construction of the artificial energy island, which will be built some 45 kilometres off the Belgian coast, is already underway. In April 2025, the first two of 23 caissons were submerged at their final location.
