Serbian electricity transmission system operator Elektromreža Srbije (EMS) has launched one of its most important infrastructure projects of the decade after signing a contract for the construction of a new 400/110 kV substation in Belgrade worth 50 million euro. This was reported by.

Serbia's electricity transmission operator EMS has signed a contract with a consortium of construction firms to build the new 400/110 kV Belgrade 50 substation in Ugrinovci. The project, worth around 50 million euros, is scheduled for completion in 2027. The substation will feature complete 400 kV.

The Ministry of Construction, Transport and Infrastructure has launched an early phase of public consultation for the spatial plan of the special purpose area for BeoGrid 2025. The project envisages the construction of infrastructure to facilitate the grid connection of new wind and solar power.

A 103 MW waste-to-energy facility at the Waste Management Center in Vinča has officially started operating on July 1, according to Beo Čista Energija. The company is rehabilitating the old landfill and building a new one in Vinča, near Serbia's capital Belgrade. Beo Čista Energija started waste.

Hydrogen fueling stations will be located at entrances into Serbia, since more and more trucks consume hydrogen. The state's intention is to "adapt our highways and roads to the coming times, primarily to cater to electric vehicles and other vehicles which operate on alternative fuels," the.

The history of Serbia's energy development dates back to 1893, when the first public power plant, the Dorćol Thermal Power Plant, began operation in Belgrade. Over the decades, a network of thermal and hydroelectric power plants was built, including the country's oldest active plants, the "Pod.
