

Belize 10kv battery energy storage

Overview

The project will install four 10-megawatt battery systems in key districts—San Pedro, Dangriga, Orange Walk, and Belize District—improving the country's ability to manage its power supply, reduce outages, and optimize electricity costs for consumers.

The project will install four 10-megawatt battery systems in key districts—San Pedro, Dangriga, Orange Walk, and Belize District—improving the country's ability to manage its power supply, reduce outages, and optimize electricity costs for consumers.

Washington, D.C., February 5, 2025 - The Government of Belize, in partnership with the World Bank and the Government of Canada, announced the launch of a new energy project aimed at strengthening the country's power supply and improving the reliability of its electricity services. The \$58.4 million.

Belize Electricity Limited (BEL), in partnership with the Government of Belize and with funding from the World Bank, continues to work diligently on deploying a 10 MW Battery Energy Storage System (BESS) in San Pedro Ambergris Caye. The project will be developed at BEL's property behind the BEL.

The \$58.4 million Belize Energy Resilience and Sustainability Project (BERS) aims to optimize electricity costs for consumers while expanding the use of renewable energy sources, addressing critical energy security challenges that have long plagued the nation. Belize currently imports approximately.

The Project will strengthen the reliability and resilience of the national electricity system and enable greater renewable energy integration via the installation of four 10 MW Battery Energy Storage Systems (BESS). The Project is also focused on strengthening the electricity system's operational.

BELMOPAN, Belize (CMC) — Belize has launched a new energy project aimed at strengthening the country's power supply and improving the reliability of its electricity services. The US\$58.4 million initiative, in partnership with the World Bank and the government of Canada, will also help optimise.

The new Belize Energy Resilience and Sustainability Project will deploy state-

of-the-art battery energy storage systems across four strategic locations in the country, marking a significant step forward in modernizing Belize's energy infrastructure and reducing its dependency on electricity.
