

Bess battery storage for sale in New-Zealand

Overview

Where is New Zealand's first large-scale battery storage system located?

Meridian Energy has officially opened New Zealand's first large-scale grid battery storage system at Ruakākā, the first of its kind, and a milestone in the country's renewable energy infrastructure development. The Ruakākā Battery Energy Storage System (BESS) delivers 100 megawatts (MW) of maximum output with 200 MW-hour storage capacity.

Is Genesis Energy building a battery energy storage system in New Zealand?

Genesis Energy, a publicly listed energy company in New Zealand, has officially commenced the construction of a 100MW/200MWh battery energy storage system (BESS) on the North Island. The company announced that construction began on June 5, 2025, at the Huntly Power Station, which is the largest thermal power station in New Zealand.

What is a battery energy storage system?

A battery energy storage system (BESS) is a technology that allows for the storage of electrical energy in batteries, which can then be used to power electrical loads. BESS can be used for a variety of applications, including grid stabilisation, load shifting, backup power, and integration with renewable energy sources such as solar and wind power.

How many MW is a Bess system?

The project will feature an impressive 100 MW output and 203 MWh. Meridian Energy has completed construction of New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā, with an official opening ceremony scheduled for later today.
