## Overview

---

The simple answer is that it will cost around €5000 (for six solar panels) and €12,000 (for 18 solar panels), including an inverter and installation, but excluding VAT. As of January 2023, you do not have to pay VAT on solar panels for your home. Solar panels are a big investment.

The simple answer is that it will cost around €5000 (for six solar panels) and €12,000 (for 18 solar panels), including an inverter and installation, but excluding VAT. As of January 2023, you do not have to pay VAT on solar panels for your home. Solar panels are a big investment.

For a roof with 10 solar panels, you pay € 4408 to € 5714 on average in 2025, which you earn back within 4 to 6 years. What your exact investment and payback period are, depend on your wishes and what suits you best. In this article, you can read more about how we calculate the price for a solar.

What do solar panels cost on average?

In 2025, an average system of 10 solar panels (about 3,700 Wp) will cost between €4,500 and €7,500, including installation and inverter. The exact price depends on several factors, such as the choice between micro inverters or a string inverter, and the.

r) and the cost of installation also play a role. On average, you pay around EUR500 to EUR600 per solar panel, including installation. The cost of solar panels depend on the number of panels and the power per panel. In general, the more panel panels and low interest rates ensure rapid growth.

**Cost of solar panels** The cost of solar panels depends on several factors. Firstly, the quantity of panels you want to install on your roof determines the price. The more panels, the cheaper it becomes. In addition, the specifications of the panels (such as power) and the cost of installation also.

The Dutch government extended the Investment Subsidy for Sustainable Energy (ISDE), and there's up to €30 million available for the purchase and installation of solar panels. As of January 1, 2023, the VAT on solar panels is 0% if they are delivered and installed on or near a home. This means you.

At what price solar panels can be purchased has changed greatly in recent years, and now the price has stabilized at a low level. There is healthy competition among the many manufacturers, and you as a consumer can take advantage of that. So what are the things you should think about?

There is. How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around €500 to €600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

Should you install solar panels in the Netherlands?

Another reason to consider installing solar panels in the Netherlands right now is that the Dutch government will actually foot part of the bill. Currently, the Dutch government is offering a sustainable energy investment grant (ISDE) to compensate for the cost of energy-saving and sustainable installations.

What are the different types of solar panels in the Netherlands?

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels. Monocrystalline panels are made using silicon and have an aluminium frame. These panels are more efficient in producing electricity from sunlight because of the structure of the cells.
