With global battery storage capacity expected to hit 1.3 TWh by 2030, governments are rolling out subsidies like confetti at a parade – but only if you know where to look. This blog breaks down the juiciest incentives, real-world case studies, and sneaky pitfalls you'll want to avoid. Let's dive.

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in 40 years. Long Duration Electricity Storage.

The UK has earmarked more than £50 billion of subsidies to support carbon

capture and storage (CCS) projects that together only account for 8% of the country's 2050 CCS target. Most applications targeted for CCS in the UK are far from technologically proven at scale. There is a risk that projects. What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

What is the Great British Energy SSP?

This will be laid before Parliament. The SSP will outline Great British Energy's mission: to drive clean power deployment to boost energy independence, create jobs, and ensure UK taxpayers, billpayers, and communities reap the benefits of clean, secure, homegrown energy.

What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

Is the £50 billion CCS subsidy a tip of the iceberg?

"Given the technical immaturity of CCS and its track record of cost overruns, this £50 billion subsidy amount is likely the tip of the iceberg," said Andrew Reid, an IEEFA energy finance analyst and author of the report. "The government has failed to assess the full financial impact of CCS support on taxpayers.
