

# Bucharest energy storage power station construction

## Overview

---

Bucharest, October 20, 2025 — The Europe Today: Romanian power supplier and distributor Electrica S.A. (BSE: EL) today announced the initiation of permitting procedures for 15 battery-energy-storage system (BESS) parks, with a total capacity of approximately 1 GWh, as part of.

Bucharest, October 20, 2025 — The Europe Today: Romanian power supplier and distributor Electrica S.A. (BSE: EL) today announced the initiation of permitting procedures for 15 battery-energy-storage system (BESS) parks, with a total capacity of approximately 1 GWh, as part of.

Bucharest-Titan power station is a power station under construction in Bucharest, Bucuresti, Romania. Loading map. Unit-level coordinates (WGS 84): CHP is an abbreviation for Combined Heat and Power. It is a technology that produces electricity and thermal energy at high efficiencies. Coal units.

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage system (BESS) in Romania. The facility, located in Florești, Cluj County, has an installed power of 200 MW and a storage capacity of 400 MWh. At the.

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names. Recent updates about investments in battery energy storage.

Bucharest, July 22, 2025 – Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest battery energy storage project in Romania. The installation, which will be built in Florești, Cluj County, will have a capacity of 200 MW / 400 MWh and is.

Bucharest, October 20, 2025 — The Europe Today: Romanian power supplier and distributor Electrica S.A. (BSE: EL) today announced the initiation of permitting procedures for 15 battery-energy-storage system (BESS) parks, with a total capacity of approximately 1 GWh, as part of its broader 2030.

The storage unit is charged with energy produced by an operational 50 MW wind

farm and a 35 MW PV project under construction, named Gălbiori 2, which is set to be grid connected by the end of 2024. It will be charged with energy from the national grid when there is no wind or sun. [pdf] Will.
