

Bulgaria Energy Storage Container Production Plant

Overview

International Power Supply (IPS) has officially opened its new battery energy storage system (BESS) manufacturing facility near Sofia, Bulgaria – a site recognized by the European Commission as a Strategic Project under the Net-Zero Industry Act.

International Power Supply (IPS) has officially opened its new battery energy storage system (BESS) manufacturing facility near Sofia, Bulgaria – a site recognized by the European Commission as a Strategic Project under the Net-Zero Industry Act.

Production has begun at a battery energy storage system (BESS) factory designated as a project of strategic importance by the European Commission (EC) due to its use of local supply chains. An inauguration event was held earlier this month (10 October) for the factory, at Hemus High-Tech Industrial.

International Power Supply (IPS), a Bulgarian manufacturer of battery energy storage systems, is about to launch operations at its new facility near Sofia. Its latest model has 8.2 MWh and fits into a standard container. The company plans to double the factory's annual capacity to 3 GWh already by.

The manufacturing facility has launched with 3 GWh annual capacity, set to expand to 5 GWh by Q2 2026. International Power Supply (IPS) has officially opened its new battery energy storage system (BESS) manufacturing facility near Sofia, Bulgaria – a site recognized by the European Commission as a.

Three years ago, SCU deployed the country's first 40ft containerized energy storage system at a solar farm in Bulgaria, setting a precedent for large-scale industrial and commercial energy storage. Now, three years later, how is this system running?

What value has it brought to customers?

This.

In June 2024, the 25 MW / 55 MWh utility-scale battery energy storage system (BESS) located in Razlog Municipality, Southwestern Bulgaria commenced

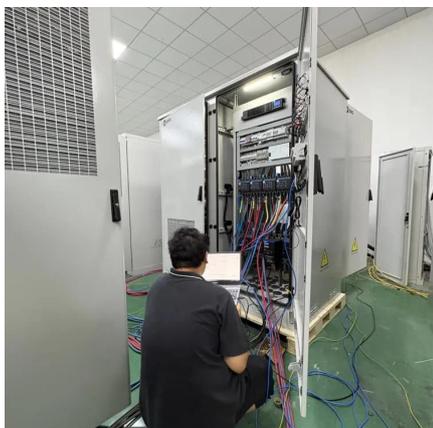

commercial operations. This significant milestone marks the system as Bulgaria's largest BESS project to date, jointly developed by Kehua and Solarpro.

ly attracting significant interest from foreign and domestic companies alike. Substantial investment will be required, as the energy system transitions towards a more diverse energy mix, including high levels of renewable generation and new approaches to power system engineering and management.
