

Busan South Korea containerized generator

Overview

Will waste aggregate be used in Busan new port redevelopment projects?

Wasted aggregate, which is reprocessed to a concrete following the high-quality standard, is planned to be used in the ongoing six construction projects in the Busan New Port, port hinterlands, and port redevelopment sites.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

Is Busan Port a sustainable port?

Amid growing concerns about environmental pollution and the exhaustion of resources, the Busan Port Authority (BPA), managing and operating the Busan Port, has spared no effort to continue the internal and external discussions and technological innovations for a sustainable port.
