

Can individuals install energy storage power stations

Overview

Should I install a battery or energy storage system?

Installing an energy storage system can help you prepare for a PSPS or other outage types. A battery will use stored grid or solar energy to keep your home running when grid power is disconnected.

Do I need a permit for a commercial energy storage system?

Commercial energy storage systems must be designed by an Electrical Engineer. If a photovoltaic system is also part of the installation, please refer to the City of Covina - Residential Submittal" checklist. Solar PV systems will be on a separate SPV permit. *NOTE: that LA County Fire review and approval is required prior to permit issuance.

How does my energy storage system work?

Your energy storage system will charge either from the grid or solar while it is not in use. The amount of stored power will depend on your home's energy usage as well as the size of your energy system. This stored energy will then keep your home powered on during an outage or a PSPS.

Do I need planning clearance for a commercial energy storage system?

Planning clearance is required prior to submission to Building Application for permit. Commercial energy storage systems must be designed by an Electrical Engineer. If a photovoltaic system is also part of the installation, please refer to the City of Covina - Residential Submittal" checklist.
