The ACT remains on track to become home to Australia's largest community-owned solar farm after early site preparation works including test pitting for Aboriginal artefacts recently commenced for the 1MW project north of Canberra Airport. The site's location is within the wider planning approval.

We're a community-owned company based in Canberra, ACT. The Majura Community Energy Project is our flagship development, a 1.2MW solar farm, powering 260 ACT households each year and returning income to our investors. We're proud to be part of the energy transition in the ACT, contributing more.

Learn how Australian-made solar glass panels offer stunning aesthetics and integrate seamlessly with building-integrated photovoltaics (BIPV). See clear solar panels vs traditional systems and start your sustainable energy journey with Energy Matters. As Australia continues to embrace cutting-edge.

This goal was reached in 2020 when the Australian Capital Territory (ACT) — home to the nation's half a million-strong capital, Canberra — had enough renewable electricity to make coal and gas obsolete. It was the first state or city with a population above 100,000 to decarbonize its grid outside.

Many Canberra households have adopted rooftop solar systems, using solar helps support the ACT's electricity supply to be 100% renewable. Use our Solar Calculator to determine if a solar system is right for your home. It can help you estimate annual power bill savings and payback period. If you're.

The Majura Community Energy Project is a 1.2MW solar farm, nestled in the Majura

Valley in Canberra, next to the Mount Majura Vineyard. It is the first development project of SolarShare. The project was funded by more than 350 investors from the ACT community each contributing between \$500 –.
