

Central Asia Solar Outdoor Power Shop

Overview

Why is solar power a good investment in Asia?

Clean energy infrastructure investment in the region has been high in order to reduce carbon emissions with cheaper technology and economies of scale. The Renewable Energy Status Report (Asia and Pacific) shows that solar power capacity has more than tripled in the region in recent years.

Will solar energy lead the growth of Asia?

Solar energy will lead this growth, whose regional capacity will nearly double from about 215 GW to 382 GW in the same period. Before the Covid-19 pandemic, energy transition was already on the rise in Asian countries.

Is Asia's solar market a missed opportunity?

China aside, Asia's solar market remains widely untapped. This is a huge missed opportunity, considering that the region faces unique circumstances. On the one hand, it is home to around 60% of the world's population and will see massive energy demand growth in the upcoming years.
