China unveils the world's first military-grade mobile 5G base station, developed by China Mobile Communications Group and the PLA, designed for battlefield use to enable seamless communication for up to 10,000 military robots and drones within a 3-kilometer radius. The system offers high-speed.

The world's largest nuclear power base, built around China's domestically developed Hualong One reactor, has completed the first phase of construction, marking a milestone in Beijing's push to expand third-generation nuclear power technology. China Central Television reported Thursday that Unit 2.

President Xi Jinping has repeatedly called for China to transform into a leading "space power," and a 2022 Chinese government white paper states plainly that China's space industry "serves the overall national strategy." While Beijing insists that it utilizes space for peaceful purposes and aspires.

Dating back decades, the "Space Race" was not just about the ideological competition between the communist Soviets and the free West, it had real world national security implications. That is even more true today. As technology has advanced and the cost of entry into space has plummeted, what once.

On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East Ningxia Composite Photovoltaic Base Project under CHN Energy, was successfully connected to the grid. This marks the completion and operation of the largest grid-forming.
