---

Find a charging point to charge your electric vehicle in our charging points map.

Find a charging point to charge your electric vehicle in our charging points map.

If you're an EV driver looking for EV chargers in Czechia, you're in the right place. Electromaps database contains 2,143 charging stations available throughout the country, making it easier for drivers to power their vehicles on the go. Unknown city (temporary) is the city with more charging.

Drivers can charge their cars at home, at work or on the road - on motorways, car parks, near shopping centres or petrol stations. We remind you that you can purchase home and commercial charging stations in our online store and also use the public charging stations ECOFACTOR charging points.

Gas stations are easily found throughout the country; charging stations are mainly located in cities and along highways. Gasoline and diesel prices in the Czech Republic are generally cheaper than in many other European countries. The cost of charging EVs in the Czech Republic is also affordable.

We are the official, trained and certified partners of charging station manufacturers such as ABB, KEBA, ECOTAP, Schneider, and others. Our catalogue contains a wide spectrum of charging stations from a complete range of international manufacturers: We are able to provide connection of charging.

The Czech Republic is expanding its electric vehicle (EV) infrastructure to meet the increasing demand for sustainable transportation. As more drivers switch to EVs, reliable and accessible charging stations are essential. Below are the top 5 charging station brands leading the way in the Czech.

To charge an electric vehicle, a charging station is required. Networks are getting bigger. The two primary options for charging for less than an hour in the Czech Republic are very fast charging stations (over 100kW) and 50kW "quick" charging stations. The fastest charging stations should, in.
