

China's first solar container communication station inverter connected to the grid

Overview

Experts have uncovered secret communication devices hidden in Chinese-made solar power inverters, raising serious alarms about potential sabotage of U.S. infrastructure in the event of a conflict. Intelligence insiders warn this may be part of China's long-term.

Experts have uncovered secret communication devices hidden in Chinese-made solar power inverters, raising serious alarms about potential sabotage of U.S. infrastructure in the event of a conflict. Intelligence insiders warn this may be part of China's long-term.

Experts have uncovered secret communication devices hidden in Chinese-made solar power inverters, raising serious alarms about potential sabotage of U.S. infrastructure in the event of a conflict. Intelligence insiders warn this may be part of China's long-term cyber warfare strategy. Undocumented.

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented communication modules and secret radios embedded in some Chinese-manufactured solar inverters and battery systems. Not.

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with the investigations told Reuters. These undocumented communication modules offer an invisible back door into.

President Trump discusses lowering prescription drug prices, relations with China and his trip to Saudi Arabia on 'Hannity.' NEW You can now listen to Fox News articles! U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy.

A group of engineers in the U.S. opened up a solar inverter and inspected it. Everything looked fine at first, but buried deep inside, they found something that wasn't listed in the manuals: A small communication module capable of sending and receiving signals. The presence of this hidden Chinese.

An unidentified illegal communication device has been found in Chinese solar

inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy infrastructure. On the 14th, Reuters quoted a U.S. energy official as saying, 'An unidentified communication device was found.
