

# Communication wireless base station installation

## Overview

---

According to the requirements, connect the base's LAN port with the gateway device, such as router, LAN switch. (This step is optional.) Embed the connected cables in the trunking according to the outlet direction at the bottom. Place the base on a stable flat surface to complete.

According to the requirements, connect the base's LAN port with the gateway device, such as router, LAN switch. (This step is optional.) Embed the connected cables in the trunking according to the outlet direction at the bottom. Place the base on a stable flat surface to complete.

**Voltage check** Check whether the voltage of DC power supply or external power supply is within the working range of this product (5V/1A). Adjust the antenna (Figure 1) Press the heads of the antennas at both ends of the device (marked with red lines) with slightly, the antennas will automatically.

We cover the process of installing a Firecom apparatus communication system from front to back, including power requirements, the wiring plan and connecting the 5000D Series Digital Intercom (including two-way radio integration), WB505R Wireless Base Station, 500-Series Wireless Headsets and.

The Firecom Wireless Base is backwards compatible with the Firecom first generation wireless DECT and DECT6 headsets, with minimal loss in functionality. The Wireless DECT7 communications are transmitted in a high definition wide band audio format. This gives greater clarity of voice, and allows.

Connect the base's Power port with the power adapter. Connect the base's RS232 port with the cash register's serial port. (When you do this step, skip step 3.) Connect the base's USB Slave port with the cash register's USB port. (When you do this step, skip step 2.) According to the requirements.

ctors on the back of the base station. T e of sight, with a maximum mounting holes underneath the device. The g he adapter into a 230V wall so .
