

Compact power station factory in Guinea

Overview

Spanish energy solutions provider Himoina has delivered a 24 MW power plant for a metallurgical facility in Kouria, Guinea-Conakry. The installation is designed to mitigate frequent power outages affecting industrial activity and to ensure a stable electricity supply for the plant.

Spanish energy solutions provider Himoina has delivered a 24 MW power plant for a metallurgical facility in Kouria, Guinea-Conakry. The installation is designed to mitigate frequent power outages affecting industrial activity and to ensure a stable electricity supply for the plant.

This page lists the main power stations in Guinea contributing to the public power supply. There are also a number of private power plants supplying specific industrial users such as mines and refineries. Guinea is considered to have considerable renewable energy potential. Schemes are at an advanced stage.

Himoina has completed a project to supply a comprehensive power solution for a metal factory in Kouriah, Guinea. Himoina provided a comprehensive solution that includes 12 diesel generator sets, eight fuel tanks, medium-voltage switches, step-down transformers, synchronisation and fuel automation.
