Renewable energy enthusiasts now have reason to celebrate: EVAPCO offers a solar-powered evaporative cooling tower. The SUN cooling tower, available in two sizes—241 and 383 nominal tons—is paired with PV panels to dramatically reduce energy consumption. An EVAPCO solar-powered SUN cooling tower.

EVAPCO, Inc. continues its dedication to energy efficiency improvements with the newest AT Series induced draft, counterflow cooling tower – the EVAPCO SUN. Crafted from decades of engineering know-how, the SUN cooling towers series from EVAPCO features state-of-the-art induced draft, counterflow.

Yes, cooling towers can be integrated with solar power to improve energy efficiency and reduce operating costs. While cooling towers themselves are typically not directly powered by solar energy, various components and systems associated with cooling towers can benefit from solar power integration.

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

Cooling towers are an essential component in industrial, commercial, and HVAC cooling systems, ensuring efficient heat dissipation and energy savings. As we enter 2025, cooling tower prices continue to fluctuate due to technological advancements, raw material costs, and energy efficiency trends. If.

Crafted from decades of engineering know-how, the SUN cooling towers series from EVAPCO features state-of-the-art induced draft, counterflow technology to deliver superior operating advantages in any climate. From performance to maintenance, they simply work smarter.

Which cooling tower is best?

Stainless steel and concrete cooling towers offer better longevity but are more expensive. Hybrid and adiabatic cooling towers reduce energy and water consumption, but they come at a premium price. Variable frequency drives (VFDs) and smart automation systems add to the cost but provide long-term savings.

How will cooling tower prices change in 2025?

Cooling tower prices in 2025 are influenced by rising material costs, energy efficiency demands, and smart technology advancements. While initial costs may be higher, investing in energy-efficient, well-maintained systems can save money in the long run.

Why should you buy a pre-owned cooling tower?

Some suppliers offer certified pre-owned cooling towers at 30-50% lower costs. Routine inspections and cleaning prevent major repairs, extending the unit's lifespan. Using high-quality water treatment systems reduces scaling, corrosion, and biofouling, minimizing operating costs. Request multiple quotes to find the best price.
