Up to four external battery cabinets may be connected to the SolaHD S5KC UPS to increase battery run times. The external battery cabinet (EBC) requires one of the optional EBC cable kits for connection to the UPS. Each optional cable kit contains the power and communication cables required for.

Pick the right voltage for your battery setup. Higher voltage saves energy and works better for telecom use. Charge your batteries evenly to keep them healthy. This stops problems that can make them wear out faster. Check your batteries often and replace old ones quickly. This avoids sudden.

-45 port labeled "Battery CAN Bus." This port combines the pin configurations of the RS-485. It is available in the internal module regardless of inverter settings. Not shown on the above image but would allow up to 12 in our capacity connected to the network.

HBMS100 Energy storage Battery cabinet is consisted of 13 HBMU100 battery boxes, 1 HBCU100 master control box, HMU8-BMS LCD module, cabinet and matched wiring harness, etc. The HBMU100 battery box and HBCU100 master control box communicate with each other via CANBUS. The HBMS100 battery box.

The series (at most 15 battery units) works with HVCB-02A. The system control devices, fuses and relay safety of the battery. It has functions of fault alarm and protection, safety protection lamp, emergency stop and step-by-step disconnect of the system during maintenance. The technical parameters.
