

Double-glass foldable solar modules

Overview

What is a double glass solar module?

In the ever-evolving world of photovoltaic technology, double glass solar modules are emerging as a game-changer. By encapsulating solar cells between two layers of glass, these modules offer unparalleled durability and efficiency. But what exactly sets them apart?

What are double glass solar modules?

.

How much does a double glass solar panel weigh?

1-Weight: Double Glass Solar Panels have a heavier weight than other types of solar panels by almost 6kg for an average solar panel of 390w to 400w. Making it harder to lift & need special equipment to handle the right way.

Are double glass solar panels a good option?

Therefore, Double Glass Solar Panels are a good option to let some sunlight in but not too much to heat up the cars. Landscape roofs: In landscape roofs, it is forbidden to cover the natural sky look therefore they use glass buildings in such areas making Double Glass Solar Panels merge with such areas without appearing odd.

What is a double glass module?

In contrast, double glass modules replace the polymer layer with another glass sheet, creating a robust sandwich structure. At IBC SOLAR, we use 2,0 mm x 2,0 mm glass layers, whereas some other market offerings use thinner 1,6 mm x 1,6 mm layers. This ensures greater durability and longevity.
