What Is Energy? Energy Explained

Energy refers to the ability or capacity to do work or cause changes in a physical system. Most people think of energy as the "fuel" or "power" that allows things to happen or work to be done.

...

[Request Quote](#)

What is energy? explained

Scientists define energy as the ability to do work. Modern civilization is possible because people have learned how to change energy from one form to another and then use it to do work.
