

# Energy storage power station base station

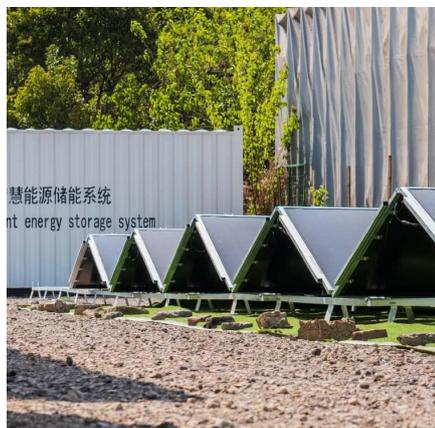

## Overview

---

A battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of technology that uses a group of in the grid to store . Battery storage is the fastest responding on , and it is used to stabilise those grids, as battery storage can transition fr.

### Energy Storage Program

Energy Storage Is Powering New York's Clean Energy Transition  
Energy Storage Safety  
An Expanded Goal of 6 Gigawatts by 2030  
In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified some of the most aggressive energy and climate goals in the country, including 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. See more on [nysrda.ny.gov](http://nysrda.ny.gov)

## Battery energy storage system - Wikipedia

Overview Construction Safety Operating characteristics Market development and deployment

A battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of energy storage technology that uses a group of batteries in the grid to store electrical energy. Battery storage is the fastest responding dispatchable source of power on electric grids, and it is used to stabilise those grids, as battery storage can transition fr...
