

# Energy storage power station residents

## Overview

---

What happened at Vistra Energy's Moss Landing battery storage facility?

A fire at Vistra Energy's Moss Landing battery storage facility in California destroyed thousands of lithium batteries – and a significant amount of the state's clean energy storage capacity.

Does Vistra have a lithium-ion battery facility?

Vistra's lithium-ion battery facility went online at the site in 2020, in an expansion approved by the California Public Utilities Commission. Facilities like the one in Moss Landing store excess energy collected during the day and release it as electricity into the grid at night.

Should energy storage be a Wake-Up Call?

Lead attorney Gerald Singleton called the fire a wake-up call for the energy storage industry. "Communities living near these facilities deserve better safeguards, transparency, and accountability," he said in a statement. "Energy sustainability should never come at the expense of public safety."
