

Eps battery cabinet assembly

Overview

What are custom-built EPs cabinets?

Custom-built EPS cabinets integrate used battery packs into a single unit without the need for expensive reconfiguration. EPS cabinets are easily monitored and controlled, making eventual recycling and repurposing efficient and risk-free.

What is EPs cabinet controller?

EPS Cabinet Controller (ECC) software connects and disconnects batteries to optimize each string's safely charge and discharge while managing cabinet temperature, voltage balance, and other potential hazards. Continuous management and optimization deliver maximum potential yield. The ECC can manage as many as 32 battery packs per cabinet.

Why should you choose EPs cabinets?

EPS cabinets are easily monitored and controlled, making eventual recycling and repurposing efficient and risk-free. Cabinets are shipped to project sites ready for rapid plug-and-play installation. Intelligence is needed for disparate batteries to operate safely and optimally as a single unit.

What is a typical battery cabinet?

A typical cabinet integrates batteries, racking and chargers into an indoor (NEMA 1 or IP21) or outdoor (NEMA 3R or IP54) rated enclosure. There are many different options and accessories available, making every system unique and built to your site-specific needs.
