

Estonia 40W energy storage project

Overview

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica Sole and Mirova, aims to bolster energy security and support.

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica Sole and Mirova, aims to bolster energy security and support Estonia's transition.

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru.

The launch of the Auvere battery storage facility marks a turning point in Estonia's energy landscape. With a capacity of 53 megawatt-hours—enough to cover just 2–3% of Estonia's average hourly electricity consumption—this pilot project may seem modest in scale. Yet its impact on the stability.

Eesti Energia opens the largest battery storage in Estonia. The investment in the Auvere battery amounts to €19.6 million. A unique 400 MWh battery complex is taking shape in Estonia, marking one of Europe's largest energy storage projects. When it comes to energy, compact Estonia thinks big. The country, aiming for a full-fledged green transition, is building unique infrastructure to bring this moment closer.

Estonia has laid the cornerstone for what will become the largest battery park in

continental Europe, marking a crucial step toward synchronizing the Baltic power grids with the rest of Europe by 2025. The project, spearheaded by the Baltic Storage Platform—a joint venture between Estonian energy.
