

# Estonia s largest solar energy storage company

## Overview

---

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia.

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia.

Recently, Trina Solar and Sunly, Estonia's leading energy company, officially signed a battery energy storage system contract for the Raba Solar Power Station. According to the agreement, Trina Storage, a subsidiary of Trina Solar, will provide a 21MW/42MWh energy storage system for the project.

Estonia is taking a significant step toward a sustainable future with the approval of a major solar-plus-storage project at the site of a former oil shale quarry in northwestern Ida-Viru County. This ambitious initiative, a collaboration between Baltic Green Energy and energy company Stora Enso.

Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County. The 26.5 MW/53.1 MWh system was developed to boost the stability of the regional electricity grid and mitigate high peak.

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW Raba Solar Park in Pärnu County, Estonia. The total project cost is US\$7.6 million. The project will be built without subsidies. Construction is set to begin this summer.

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia. The JV between Estonian energy company Evecon, French solar PV developer Corsica Sole, and asset manager Mirova will develop the 2-hour duration systems, with.

Recently, Estonia welcomed its largest solar park, capable of powering 35,000 households, now another such step is the development of two battery energy storage systems in Harju County, North Estonia. The €100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery.
