

European battery pack

Overview

What is the Europe EV battery pack market size?

The Europe EV Battery Pack Market size is estimated at 30.72 billion USD in 2025, and is expected to reach 55.88 billion USD by 2029, growing at a CAGR of 16.14% during the forecast period (2025-2029).

Which segment dominates the European electric vehicle battery pack market?

The passenger car segment dominates the European electric vehicle battery pack market, commanding approximately 92% market share in 2024. This substantial market position is driven by increasing consumer adoption of electric vehicles across major European markets, including Germany, France, and the UK.

Who are the leading EV battery pack manufacturers in Europe?

The European EV battery pack market features several prominent players, including SAIC Volkswagen Power Battery, BYD Company, LG Energy Solution, Samsung SDI, and CATL as market leaders.

Why is the UK a leader in the European EV battery pack market?

The United Kingdom has maintained a strong presence in the European EV battery pack market through its focused approach to electric vehicle adoption and battery technology development. The country's market position is supported by its comprehensive industrial strategy that prioritizes electric mobility and battery manufacturing.
