

# Exchange on environmental protection project using Niger solar-powered containers

## Overview

---

A coalition of Nigerian and international non-governmental organisations has launched a solar energy initiative to tackle the severe environmental pollution caused by gas flaring, oil spills, and greenhouse gas emissions in the Niger Delta.

A coalition of Nigerian and international non-governmental organisations has launched a solar energy initiative to tackle the severe environmental pollution caused by gas flaring, oil spills, and greenhouse gas emissions in the Niger Delta.

The project was implemented by ADKOUL in Tillia, Tchintabaradene and Abalak in the north of the administrative region of Tahoua in Niger. It began in January 2022 and ended in 2023. This good practice rehabilitated pastoral land and provided food and water for displaced populations, host.

The local government decided to adopt a renewable energy solution: solar + energy storage system to provide a reliable power supply for villages and solve long-term power consumption. problem. This initiative will bring the dawn of sustainable development to the desert village and bring substantial.

RANA is a flagship project of the Desert to Power Initiative in the country, the priorities of which were set out in the national roadmap approved in 2020. It is consistent with the Bank's CSP 2018-2022 and sector policies detailed above, as well as with Niger's national priorities. The RANA.

The Niger Solar Electricity Access Project (NESAP), aimed at enhancing electricity access in rural and peri-urban areas of Niger through solar energy, started in 2017 and has built 15 solar power plants. This project, funded by the World Bank through the International Development Association (IDA).

A coalition of Nigerian and international NGOs has expressed concern over the environmental pollution caused by gas flaring, oil spills, and greenhouse gases in the Niger Delta. Organizations including the Network Advancement Program for Poverty and Disaster Risks Reduction (NAPPDRR), Global.

A coalition of Nigerian and international non-governmental organisations has launched a solar energy initiative to tackle the severe environmental pollution caused by gas flaring, oil spills, and greenhouse gas emissions in the Niger Delta.

The initiative, led by the Network Advancement Program for.
