Decommissioned shipping containers are a smart, durable, and cost-effective solution for worksites, providing secure onsite storage for tools, equipment, and materials. Built to withstand extreme weather and heavy use, these steel containers offer a portable and weatherproof option that keeps.

Our foldable boxes are designed for long-term use, providing a cost-effective, sustainable packaging solution. These boxes are easy to fold when not in use, saving valuable space during return shipping and storage. View a 3D model of the folding container These boxes are ideal for various.

We source, build, and tailor quality containers with a focus on sustainability and craft. We believe that you shouldn't have to choose between artful design and utility. We work directly with individuals and large companies to build creative, custom containers that are cost-effective and.

we are happy that you found us at engineered containment! For well over a decade our team of engineers has been helping consultants, owners and contractors alike with environmental protection measures - and we may be the right fit for your next project. We have an engineering permit to practice is.

For almost a decade, Kubed Living designed, engineered, permitted, and managed every aspect of shipping containers and modular builds—from initial concept to final completion. Through that hands-on experience, we saw where clients struggled most: navigating a fragmented process with too many moving.

ECS' environmental experts are prepared to support your specific needs—whether it's a one-off project or a long-term partnership—to achieve compliance with environmental regulations. From due diligence to remediation, wetland

delineations to natural resource conservation and hazardous material.
