

French home solar lights

Overview

Should you install a self-contained outdoor solar lighting system?

Rather than going through the expense and hassle of trenching electric wires, you can install a self-contained outdoor solar lighting system. In addition to initial installation cost savings, solar energy systems are a lighting solution that do not require a monthly electric or meter bill, and require little to no regular maintenance.

What is a solar powered street light?

This is a unique, solar powered, LED street light because it incorporates the solar panels into the sides of the pole. It's a fully integrated complete. This is a very unique, powerful, solar powered, all in one LED parking lot light. It's ideal for anyone wanting an advanced, integrated light fixture.

What products does solar illuminations offer?

Solar Illuminations offers a large selection of commercial solar-powered lighting systems. Most of the products we offer are commercial grade kits that are designed specifically for your requirements.

Should you buy a commercial solar light?

One-size-fits-all solar lights can be a useful option for some applications, but if you want a solar light that performs reliably year-round, rain or shine, then you'll want a heavy-duty commercial solar-powered light. When you purchase a system from us, if you desire dusk to dawn illumination, that means dusk to dawn.
