Gb solar's 5°/10° sail systems are designed with the aim of optimizing the installation of photovoltaic systems, making maximum use of the available roof area. Compared with conventional systems, they allow about 20 percent more modules to be installed while maintaining the same size. In addition.

They exclude delivery charges and customs duties and do not include additional charges for installation or activation options. Prices are indicative only and may vary by country, with changes to the cost of raw materials and exchange rates. Search in Gbsolar catalogs and technical brochures on.

We make ballasts, supports and accessories for the installation of photovoltaic modules residential and industrial All of our ballasts are modular and facilitate installation without damaging the cover. In 2024, a significant improvement was made to the composition of our mounting systems by.

Introducing the latest option for mounting solar arrays to standard CONEX shipping containers. Our solar support structures enable 6-24 solar modules to be mounted on roof surface of standard 20-40 ft shipping containers. Complete Solar Support Structures for Shipping Containers Support frames.
