

Georgia makes energy storage equipment

Overview

ATLANTA, May 7, 2025 / PRNewswire / -- Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

ATLANTA, May 7, 2025 / PRNewswire / -- Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Georgia Power advancing projects in Bibb, Lowndes, Floyd and Cherokee counties to enhance reliability, resiliency for a growing state ATLANTA, May 7, 2025 /PRNewswire/ -- Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS).

Battery energy storage systems (BESS) are designed to address these challenges by storing excess renewable energy when demand is low and releasing it when demand is high. This capability promotes a steady and reliable supply of electricity, regardless of the variability in renewable energy.

These storage options include batteries, thermal, mechanical, and more. The Center of Innovation works as an advisor to companies making advancements in storage, which is impacting energy distribution and transmission systems (the smart grid), the reliability and availability of energy resources to.

Perhaps best known outside the US for peaches and its emergence as a rival to Hollywood, Georgia is also thirsty for electric capacity and has become a hub for battery manufacturing, writes Allan Oduor of Enertis Applus+. Georgia is on track to deploy more than 1GW/4GWh of utility-scale storage by.

If Georgia's energy storage sector were a peach cobbler, it'd be bubbling with innovation instead of fruit. The state has quietly become a hotspot for energy storage companies, blending Southern ingenuity with cutting-edge tech. Let's unpack why Georgia's storage scene matters—for businesses.

Earlier this month, Georgia Power Company submitted its 2023 Integrated

Resource Plan Update (2023 IRP Update) to the Georgia Public Service Commission, which includes an Application for Certification for four battery energy storage systems totaling 500 MW. Georgia Power included attachments with.
