

# Global electric flywheel energy storage equipment

## Overview

---

In , operates in a flywheel storage power plant with 200 flywheels of 25 kWh capacity and 100 kW of power. Ganged together this gives 5 MWh capacity and 20 MW of power. The units operate at a peak speed at 15,000 rpm. The rotor flywheel consists of wound fibers which are filled with resin. The installation is intended primarily for frequency c.

## Global electric flywheel energy storage equipment

### Flywheels Energy Storage Systems

Flywheel Energy Storage Systems (FESS) offer a mature solution for enhancing stability, frequency control and voltage regulation in electrical ...

[Request Quote](#)

### China connects world's largest flywheel energy storage system to ...

China has developed a massive 30-megawatt (MW) FESS in Shanxi province called the Dinglun flywheel energy storage power station. This station is now connected to the ...
