

Global solar glass development prospects

Overview

By glass type, anti-reflective coatings led with a 57% solar photovoltaic glass market share in 2024, while TCO glass is projected to expand at 22.46% CAGR through 2030. By manufacturing process, float lines delivered 68% of 2024 volume; rolled glass is forecast to post a.

By glass type, anti-reflective coatings led with a 57% solar photovoltaic glass market share in 2024, while TCO glass is projected to expand at 22.46% CAGR through 2030. By manufacturing process, float lines delivered 68% of 2024 volume; rolled glass is forecast to post a.

It has led to increased investments in solar power projects worldwide, raising the demand for solar PV glass. The growth of solar installations, large-scale utility projects, and residential rooftop systems is contributing to the expansion of the market. To learn more about this report, [Download](#).

The solar photovoltaic glass market size reached 32.10 million tons in 2025 and is forecast to reach 74.75 million tons by 2030, advancing at an 18.42% CAGR between 2025 and 2030. This sustained expansion reflects policy-driven installation targets, rapid cost deflation across the module supply.

Global solar glass market size was forecasted to be worth USD 7.83 billion in 2024, expected to achieve USD 24.1 billion by 2033 with a CAGR of 13.3% during the forecast period. I need the full data tables, segment breakdown, and competitive landscape for detailed regional analysis and revenue.

The global solar PV glass market was valued at USD 53.5 billion in 2024 and is estimated to grow at a CAGR of 7.9% from 2025 to 2034. The demand for solar PV glass is directly impacted by the notable increase in solar installations brought about by the global push for renewable energy sources.

Global Solar Photovoltaic Glass Market is projected to be worth USD 96.36 billion by 2033 and is anticipated to surge at a CAGR of 28.69%. Solar photovoltaic (PV) glass is a kind of glass that uses solar cells to produce electricity. It is mounted on a building's roof or in its facade to provide.

As countries across the globe transition to greener alternatives, the utilization of

solar energy is gaining momentum. the U.S. Department of Energy, solar energy solutions accounted for about 3.3% of total electricity generation in the United States in 2022, with a significant increase projected in. What is the global solar PV glass market size?

The global solar PV glass market size was valued at USD 3.23 billion in 2016. The growing emphasis on the adoption of clean energy sources is likely to be the key driver for the market growth in the coming years. Clean & renewable energy is an affordable alternative to fossil fuel-based electricity.

Will Solar Photovoltaic Glass market grow in 2024?

These shifts together position the solar photovoltaic glass market for resilient growth throughout the decade. By glass type, anti-reflective coatings led with a 57% solar photovoltaic glass market share in 2024, while TCO glass is projected to expand at 22.46% CAGR through 2030.

Why is the solar PV glass market growing?

Government rules that are favorable to the development of solar PV plants is one of the factors driving the growth of the solar PV glass market. Additionally, the market for solar PV glass is growing due to the surge in demand for solar systems on a residential, commercial, and utility scale.

How big is the solar glass market by 2032?

Based on our research, the global solar glass market is projected to touch USD 21.27 billion by 2032. What CAGR is the solar glass market expected to exhibit by 2032?

Global solar glass development prospects

[Solar PV Glass Market Size & Trends , Industry Report, 2030](#)

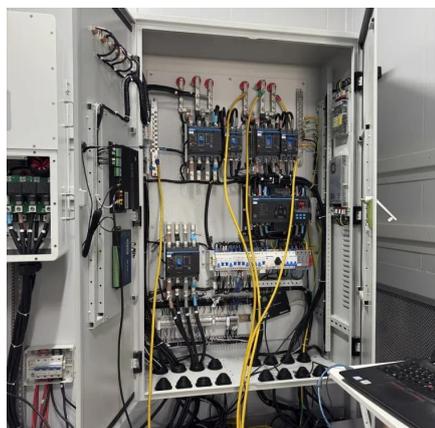

The global Solar PV Glass Market was valued at USD 10.08 billion in 2024 and is projected to reach USD 47.16 billion by 2030, growing at a CAGR of 29.5% from 2025 to 2030.
