

Green Uninterruptible Power Supply

Overview

This standby GREEN UPS offers complete protection from blackouts, brownouts and transient surges. Supports GREEN energy savings via built-in "ECO" outlets that automatically power off unused computer accessories like printers or multi-media speakers when the computer is not in use.

This standby GREEN UPS offers complete protection from blackouts, brownouts and transient surges. Supports GREEN energy savings via built-in "ECO" outlets that automatically power off unused computer accessories like printers or multi-media speakers when the computer is not in use.

UPS (Uninterruptible Power Supply) systems provide a solution that helps maintain control over power supply and better protect connected devices. UPS units are emergency power supplies that ensure uninterrupted power delivery. In the event of a power surge or outage, the UPS takes over as the.

This UPS system helps eliminate phantom loads by automatically cutting power to special energy-saving outlets when your USB-connected computer shuts down or enters standby mode. Other outlets stay on to support devices that operate continuously, such as wireless routers. When your computer starts.

Tripp Lite's ECO750UPSTAA is compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases. This standby GREEN UPS offers complete protection from blackouts, brownouts and transient surges. Supports GREEN energy savings via built-in "ECO" outlets that automatically power off.

But if you want to keep your home Wi-Fi network and some other key electronics up and running in the event of an outage, an uninterruptible power supply, or UPS, is worth the investment. The CyberPower LE1000DG is the best UPS for people who want to back up a few small electronics — such as a.
