

# Grenada solar Glass Enterprise

## Overview

---

Does Grenada have solar power?

Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day. A 2- to 4-MW PV installation is planned, but no utility-scale solar plants are currently in operation.

How much does solar cost in Grenada?

According to data from 2014, the costs of utility-scale solar in Grenada are estimated to be between \$0.21/kWh and \$0.44/kWh; wind costs are estimated to be between \$0.05/kWh and \$0.20/kWh.

Is Photovoltaic Glass a good investment?

Photovoltaic glass not only offsets conventional building material costs but also provides a tangible return on investment through energy generation. With an average payback time of 4 years and yearly ROIs of up to 20%, it stands as a sound economic choice.
