

# Honduras solar container battery New Energy

## Overview

---

Summary: Discover how Honduras' new battery energy storage plant addresses renewable energy challenges, enhances grid stability, and supports Central America's clean energy transition. Explore technical insights, regional impacts, and future opportunities in this.

Summary: Discover how Honduras' new battery energy storage plant addresses renewable energy challenges, enhances grid stability, and supports Central America's clean energy transition. Explore technical insights, regional impacts, and future opportunities in this.

The National Electric Power Company (ENEE) has selected a Chinese-Honduran consortium to design, supply, install, test, and commission a grid-connected battery energy storage system (BESS) at the Amaratoca substation in the department of Francisco Morazán. Honduran state-owned utility ENEE has.

Last week (7 November) saw bids opened for a 75MW/300MWh BESS tender launched by the government of Honduras, in Central America. The public event marked the opening of bids for the energy storage procurement, called LPI-001-ENEE-UEPER-2024, for the 'Supply, installation, testing and commissioning.

According to the report by the media outlet El Mundo, the Honduran Minister of Energy, Erick Tejada, mentioned that the contract for the construction of a 75 MWh battery energy storage system, valued at \$50.2 million, was awarded to the Chinese-Honduran consortium Windey-Equinsa. According to the.

As Honduras works to overhaul its struggling power sector, the Central American nation has taken a bold step toward attracting global investment—particularly from China. In an effort to secure its long-term energy future, the government has unveiled plans for a \$1.5 billion public tender that will.

Honduras has awarded a US\$50.2 million contract for a 75 MW battery energy storage system to the Chinese-Honduran consortium Windey-Equinsa. This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by.

Recently, Windey, in collaboration with EQUINSA, a local Honduran power company, successfully won the EPC turnkey contract for Honduras' first energy storage project—the Honduras Energy Storage Project—marking a critical breakthrough of "first bid, first win" in its international energy storage.
