

# Hospital solar container communication station inverter

## Overview

---

Can a containerized Solar System be installed off-grid?

Off-Grid Installers have the answer with a containerized solar system from 3 kW upwards. Systems are fitted in new fully fitted containers either 20 or 40 feet depending on the size required.

What is an off-grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off-Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

Are off-grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is a need to monitor and solve any problems. Off-Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.

## Hospital solar container communication station inverter

### Off-grid container power systems

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.
